

Modifications and Upgrades

Metering system modifications and upgrades with no loss of measurement

Operational Changes and Improvements

SGC offer system modifications and upgrades to meet your operational requirements. We can:

- Upgrade system software to meet the latest standards
- Provide complete replacement systems
- Deliver auditable environmental metering solutions
- Include allocation metering for satellite fields

Hot Changeover Specialists

The need to maintain continuous production means that flow metering installations often operate with computer systems beyond their life expectancy. You can eliminate this risk by engaging SGC to complete a hot changeover system replacement.

Using the combined skills of our engineering and customer support teams, SGC have performed many complex upgrades without loss of measurement.
