

Manufacture and Test

In-house manufacture and test ensure that we supply each system to meet the highest standards

Manufacturing

Our innovative approach to system manufacture has firmly established us as a market leader of flow metering control systems.

SGC is your first stop for the design, manufacture, and supply of turnkey flow metering computer systems including:

- Flowcomputer hardware and software
- Metering Supervisory Computers
- PLC hardware and software
- Control panels

Comprehensive Testing

SGC perform a 100% functional test on all of our systems before delivery. This ensures that all systems conform to the most rigorous industry standard and regulations. This is regardless of whether they are a single-stream flowcomputer, or a large-scale metering system.
